Remarks

Objectives beyond met.

room was very cold, ended significantly overtime (this presented a difficulty for me), thank you for a great

Started too late. Panels were not panels-just speakers one after another. Leave time for Q and A and panelists to debate. Too cold. Too long - please stick to time line leaving room for Q and A and discussion by panels. Mix up tables so all have "settlers" and "natives".

The air conditioning was too cold - by the afternoon, I had difficulty concentrating on the speakers. I kept looking for the signs, as promised, but from the road. I drove around the whole campus 2x and finally stopped a student for directions. An actual map of the campus would have helped me this morning - I finally found the directory and got out of my car to read it and finally found my way here.
Too much jammed in. Should have been two days.

Too much was offered for too short of time.

Room too cold. Tell people to bring own utensils and cups and plates - help the environment.
Except that better attempt to deal with late start should have been made, e.g. (1) shorten lunch, (2) table talk but no additional talk at the mics.

Thank you! *I was glad that WLU has compost bins, ut I noticed that many plates and food ended up in garbage. Thanks for the veg'n food!
Awesome! Miigwetch

Survey Results

Excellent, excellent. The AM indigenous Panel on Allyship was powerful thought provoking.
Except for late start

timing/scheduling could be improved

*** well organized

The stakeholders could be invited linking global/local

Worthwhile!! Meaningful 6! Started a bit late, not your fault. Objectives met***

Great day - great turnout! Good job organizers. You showed great leadership by hosting this.

objectives were met and exceeded

Perhaps it would have been helpful to instruct re: disposal of paper plates etc. Some ended up in garbage instead of organic waste. Room was very cold. Lunch was great.

Late starting!

Ran late = energy sagged but not much solution other than to aim lower/for less content
